OBJECTIVE

I'm an enthusiastic web developer with knowledge of the Bootstrap framework, HTML, CSS, and JavaScript. I am excellent at developing aesthetically pleasing and responsive websites and am eager to land an internship. My experience in HTML provides efficient content organisation, while my knowledge of CSS adds aesthetic finesse. My expertise in dynamic and interactive web applications stems from my solid command of JavaScript. My ability to develop responsive websites with Bootstrap ensures maximum user interaction across all devices. I do best in circumstances where there is ongoing peer learning and industry trend awareness. I'm eager to provide my expertise to cutting-edge initiatives and a creative problem-solver, ready to have a significant influence.
